Inkle-to-Card Weaving Draft

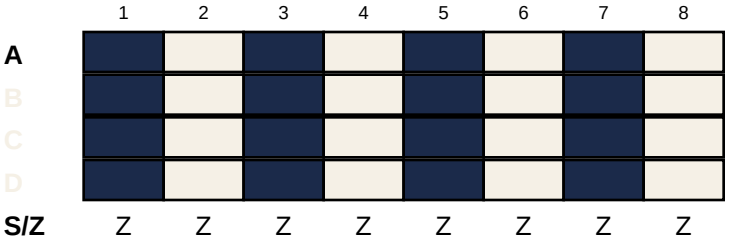
first-band

Generated 2026-10-18 by inkle-to-card

Mapping: Mapping A - one end per card, width-preserving
Cards: 8 (from 8 inkle ends)
Holes per card: 4 (labeled A, B, C, D)
Turning picks in the chart: 8
Warnings attached: 1

This deck reproduces the inkle color sequence on the woven face - see the woven preview page for what the band should look like.

R2 - Threading draft (one column per card, one row per hole)



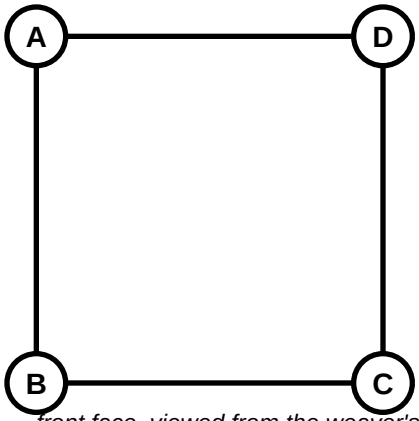
Thread every card the direction shown; "/" = Z-threading, "\" = S-threading (community notation). Holes are labeled clockwise on the front face.

R3 - Card deck summary (thread it exactly as listed, left to right)

Card 1: A=navy B=navy C=navy D=navy [Z-threaded]
Card 2: A=cream B=cream C=cream D=cream [Z-threaded]
Card 3: A=navy B=navy C=navy D=navy [Z-threaded]
Card 4: A=cream B=cream C=cream D=cream [Z-threaded]
Card 5: A=navy B=navy C=navy D=navy [Z-threaded]
Card 6: A=cream B=cream C=cream D=cream [Z-threaded]
Card 7: A=navy B=navy C=navy D=navy [Z-threaded]
Card 8: A=cream B=cream C=cream D=cream [Z-threaded]

R4 - Starting position (set this up before the first pick)

Home position: rotate every card so holes A and D are at the top, printed sides facing right, with card 1 at the left of the pack.
Holes are labeled A, B, C, D clockwise on the card's front face.
Cards are numbered left to right; card 1 sits at the left of the pack, printed sides facing right.
With holes A and D up, A and B face the unwoven warp and C and D face the woven cloth. If your cards carry colored bands or striped edges, turn them al



front face, viewed from the weaver's right
holes A and D are UP; A and B face the warp, C and D face the cloth

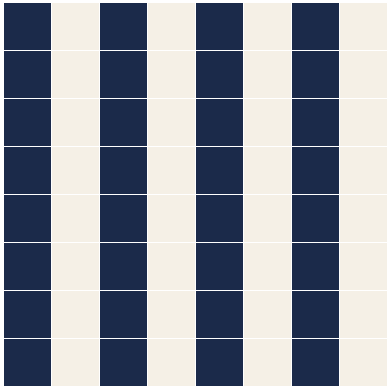
R5 - Turning chart (one row per pick, one column per card)

Turn the whole pack as one: 4F 4B (F = forward/away, B = backward/toward)

pick	1	2	3	4	5	6	7	8
1	F	F	F	F	F	F	F	F
2	F	F	F	F	F	F	F	F
3	F	F	F	F	F	F	F	F
4	F	F	F	F	F	F	F	F
5	B	B	B	B	B	B	B	B
6	B	B	B	B	B	B	B	B
7	B	B	B	B	B	B	B	B
8	B	B	B	B	B	B	B	B

Turn the pack, pass the weft, beat - one pick per row. 4F-4B is twist-neutral.

R6 - Woven preview (what the face of the band should look like)



pick 1 at the bottom, growing upward as woven; card 1 at the left
this prediction assumes the home position from page R4 and the attached turning sequence

R7 - Materials

warp length = 150 cm x 1.2 + 50 cm = 230 cm
Warp length to cut: 230 cm per thread (2.3 m)
Cards: 8 four-hole cards

Warp threads and yarn per color:
  cream: 16 threads x 2.3 m = 36.8 m
  navy: 16 threads x 2.3 m = 36.8 m

One belt shuttle (a shuttle with one beveled edge packs the weft tightly).
Weft: about the same yardage as one color's warp, in the selvedge color.
Yarn: smooth, strong, relatively inelastic (research section 2) - perle cotton 3/2 or 5/2, embroidery floss, or firmly twisted wool.

R8 - Notation legend

Holes: each card has four holes labeled A, B, C, D clockwise on its front face.
Threading: S or Z - which way the warp is strung through the holes; every hole of a card is strung the same direction. Community slash notation: "/" = Z-threading, "\" = S-threading.
Turning: F = forward quarter turn (away from you, like a bicycle wheel from the weaver's seat); B = backward quarter turn (toward you).
A pick = one quarter turn of every card + one pass of the weft.
Home position: holes A and D up before the first pick.
Cards: number them left to right, printed sides facing right; if your cards have colored bands or striped edges, keep them all oriented the same way so a turned-around card is easy to spot.
A magenta cell anywhere in this report means an unknown color name - fix the draft's palette before weaving.

R9 - Warnings (read before warping)

1. Mapping A (width-preserving): each of the 8 ends becomes one card threaded with four threads of the same color - about 4x the thread of an inkle band
2. End 1 is a single navy thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12),
3. End 2 is a single cream thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12)
4. End 3 is a single navy thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12),
5. End 4 is a single cream thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12)
6. End 5 is a single navy thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12),
7. End 6 is a single cream thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12)
8. End 7 is a single navy thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12),
9. End 8 is a single cream thread. Small dots of two colors blend in the eye (bright green with magenta weaves brown in plain weave - research section 12)
